

Hello, Earthlings!

Now available from Martian Metals... the licensed miniatures for *Traveller*.™ Incredibly detailed 15mm adventure sets of heroes... thugs and ruffians... aliens... robots... Imperial Marines... animals and creatures... and more.

Figures are cast *open-handed*, and extra tools and weapons are supplied — so you can change poses (and tech levels) easily. Drop by Mars and pick them up — or ask at your closest Earth hobby shop.

And remember: they may *look* lifelike... but they're only metal. Really.

By the way... this ad is not upside down. It is right-side-up. Your silly Earth magazines are all upside down.
